Be a detective and study fingerprints this week! Check out yours or anyone else's in your home and discover your unique patterns.

DATA COLLECTION SHEET

Look at your own fingers (or other humans in your home) and compare your prints to the diagram on the right. Which of the patterns do you see?

Choose two of your prints and try to draw them:

Do some patterns seem more common or rarer than others?

What question in your own life might be solved using dactylography? What else do you notice or wonder about fingerprints?

Send your completed sheet to danniey@sarsef.org by Friday morning to be included in our follow-up!
